Education

2022 | Design Sprint Facilitator
RED-ID Design sprint
bootcamp

2006—2010 | B.Des
B.Des honors degree from the
visual communication
department of Shenkar.

Skills

- Figma
- AI-assisted design (Claude Code, Figma MCP, design-to-code)
- Design systems
- Adobe (Photoshop, Illustrator, After Effects, Premiere, InDesign)
- HTML & CSS

Languages

- Hebrew - Native Speaker
- English - Fluent

About me

I believe that one of the most fundamental things a designer needs to do to create great designs and solve problems is to properly define the problem first.

Professional Experience

2024—Present | Freelance Product Designer Raz Cohen

Working with startups as a product designer and consultant: designed FINQ's recommendation and onboarding experience for AI-driven pension advice; redesigned Tedooo's entire web and mobile-web platform; designed Axel's car-selling flow and built its design system; at Bookaway — leading complex product projects, mentoring designers, guiding the design guild, and structuring the team's AI-assisted design workflow.

2023—Present | Lecturer at Shenkar

As part of the Visual Communication program, I teach Emotional Design, App Design and Interaction Design, and mentor students through their graduation projects.

2015—2023 | Fiverr — Product Designer → Director of Product Design

- **2019—2023 | Product Design Director & Group Manager**
Led a 25-person design group (team leaders, product designers, UX researchers). Established designer growth paths with individual ownership areas (accessibility, design ops), and scaled the work processes and cross-team alignment practices the entire product org designed by. Initiated the design system effort and led the tooling migration from Photoshop through Sketch to Figma.
- **2016—2019 | Product Design Team Leader**
Co-created the "6Qs" framework — a problem-definition doc that became Fiverr's standard for scoping every design project. Built a weekly usability-testing program (embedding tests into employee onboarding), and used its insights to make the case for dedicated research — hiring Fiverr's first UX researcher, a role that grew into a 4-person research team.
- **2015—2016 | Product Designer**
Designed flows, wireframes and UI for the entire buyer-side funnel; ran usability testing and defined project briefs and goals with Product Managers.

2014—2015 | UX/UI and Marketing Designer at Hola

UX/UI design for web and mobile products; contributed to Hola's visual identity and marketing materials.

2010—2014 | Graphic and Motion Designer at Promotheus

Motion and graphic design, including 3D animation (C4D), for leading Israeli broadcast brands.

Recent work

Tedooo — Web Marketplace & Social Platform

End-to-end design of Tedooo's marketplace and social platform across web and mobile web — from product flows to UI.

Bookaway — Fractional Design Leadership

Mentoring, hiring, and building design culture across a multi-brand travel group.

Axel — Design System & Selling Flow

Established Axel's design system from the ground up and designed the core car-selling flow for the platform.

Sweet / Salty — Self-Initiated

A baking recipe platform — designed in Webflow, fully rebuilt with AI into a live GitHub-hosted site, with AI-generated imagery and content.

Surf Face — Self-Initiated

A Garmin watch face showing surfers live wave, tide, and wind conditions — designed and built end-to-end.
